### History:

Founded in 1992 by a group of designers and engineers, Accesspro started to develop personal peripherals. Focused on innovation and quality, Accesspro dedicated itself to provide more friendly interfaces for computer users. Since trackball mice from 1992, Accesspro has successfully introduced a wide variety of mice from optical to laser and from wired to wireless. As a result, Accesspro Electronics Co., Ltd. has become a leading peripheral manufacturer specialized in mice.

### Organization:

In its headquarters located in Taipei, Taiwan, Accesspro has dedicated Sales and R&D teams that provide the best mice solutions for customers all over the world. Meanwhile, in the factory located in Dong Guan, China, Accesspro provides the best product quality from molding, tooling and injection to QC and QA systems.

### Future:

Based on the principle of developing more comfortable and convenient personal peripherals, Accesspro will keep designing better performance devices that will bring the laptop and PC user more special and wonderful experiences.
